

Rewarding

Environmental  
Performance...

created from an agreement between the Massachusetts Toxics Use Reduction program and leading environmental insurance companies. This voluntary program is aimed at rewarding Massachusetts companies by linking sound environmental performance and management with tangible insurance policy benefits.

*The Office of Technical Assistance (OTA), a **non-regulatory** branch of the Massachusetts Executive Office of Environmental Affairs, assists Massachusetts facilities with reducing their use of toxic chemicals and/or the generation of toxic manufacturing by-products. OTA's services include technology development and product research, leveraging federal and state funding to promote new equipment purchases and environmental management systems support - all at **no charge**. Through a one-on-one, hands-on approach, OTA is able to provide clear, specific guidance that businesses can readily put into action. For further information, visit the OTA web site at **[www.state.ma.us/ota](http://www.state.ma.us/ota)***
